

A black and white historical photograph of a city street. On the left, a large brick building with multiple arched windows is visible. The street is filled with early 20th-century automobiles, including several open-top touring cars and a few closed-top models. People are seen walking along the sidewalks and standing near the vehicles. The overall scene depicts a busy urban environment from the past.

We are proud of our past

Let the same be true of
our future

Share your vision for Downtown Newton at the Community Vision Forum
